Outstanding Features of LAING-BUILT HOUSES

ALL Houses are Detached or Semi-Detached. The Detached houses at the reasonable prices quoted mark an epoch in building development.

Types Tain, Moray and Rona when Semi-Detached have a joint car run, that is, an 8ft. space between each pair of houses for car access to the rear. In some cases it may be possible in these types to provide an independent car run or garage space of 8ft. at an extra charge. Types Stirling, Argyle, Rona de Luxe, Aberdeen, Aberdeen de Luxe, Belford, etc., have their own independent car runs or garage space and same is included in the price of the house.

Detached Houses have 8ft. garage space one side and 4ft. passage space the other.

We make up all roads and footpaths free of charge to the purchaser and sell the houses definitely free from all costs in this respect.

Purchasers have a wide choice of decorations, including the paint work inside and outside, the wall-papers, the wood mantelpieces and the tile surround. Interior woodwork is painted or brush-grained to purchaser's choice.

Our Show-houses are exact specimens of the houses sold, in construction, fittings and finish, and all houses are sold on the understanding that they conform in these points with the specimen houses seen.

House Types Tain, Moray and Rona, with few exceptions, conform to the same general specification given for the other types.
